Entered as second-class matter, January 19, 1904, at the Post Office at Lancaster, Pa., under Act of Congress of March 3, 1879.

EDUCATIONAL REVIEW

ANALYTICAL INDEX

....TO....

Volumes 1 to 25 January, 1891, to May, 1903

By CHARLES ALEXANDER NELSON

Head Reference Librarian, Columbia University Library

8vo. Cloth, $3.00. By mail, $3.12

"The fortunate libraries and individuals who possess complete sets of the REVIEW will be grateful for this work, which now transforms a row of bound volumes into a veritable encyclopædia of education, ready for consultation upon almost every imaginable modern educational problem. Analysis by topics is the leading feature of this index, and the work has been intelligently performed. The work is a dictionary catalogue (author and subject), extending to upwards of two hundred double-columned pages."—*The Dial*, Chicago, Ill.

EDUCATIONAL PSYCHOLOGY

By Professor EDWARD L. THORNDIKE

In this book Professor Thorndike applies to a number of social, and especially educational problems, the methods of exact science. The topics are treated in the light of the most recent researches and with the aid of modern statistical technique. The book thus provides those interested in education as a profession or as a feature of American life with a sample of scientific method in this special field as well as with important information which has hitherto been inaccessible. The attitude of the author, who is the head of the department of educational psychology in Teachers College, Columbia University, and the author of numerous original contributions to dynamic psychology, is that of a candid and painstaking student of the work that has been done in this field and upholds rigorous ideals of scientific accuracy and logic. The book is so written and illustrated as to be readable and teachable.
